

CERTUSS steam generators offer highly efficient steam generation on the tried-and-tested principle of water-tube boilers. Thanks to the use of pilot burner technology, the steam is available within seconds. Reliability and in the highest quality.

With a mission to "Never Compromise the Future", the Ubbink-Centrotherm Group (UCG) is committed to developing and manufacturing sustainable products for the plumbing, heating, and building products markets. Centrotherm explores ways to improve our world by taking a collaborative approach to creating intelligent building solutions.

Rugged steel boilers and indirect water heaters. Columbia provides excellent value for the money. Columbia has many boilers in stock, and can build to your specific requirements within a few weeks. Columbia boilers are a favorite choice for breweries, dry cleaners and food processing organizations.

De Dietrich is one of the pioneers of near condensing and condensing boiler technology. Built to ISO standards, the company produces the highest quality boilers. Located in Cambridge Ontario, DDR Americas is able to warehouse and assemble boilers to satisfy the demanding boiler market in the USA and Canada.

Diversified Heat Transfer (DHT) is a leading engineering and manufacturing company of heat exchange equipment and systems for the residential, commercial, and industrial markets. With more than 75 years of experience, DHT can customize, design, build, and manufacture innovative, technology-driven products that provide flexible, high-quality, and cost-effective solutions for a wide variety of applications.

Manufactures condensate return units, boiler feed systems, custom tanks, pumps and accessories. Specializing in stainless steel construction, Fabtek tanks, pumps and accessories come with a 20 year tank warranty and a 5 year pump warranty. Offers complete boiler room skid packages: steam boiler and accessory skids, hot water boiler/heater exchanger skids and pumping skids.

BEI, the innovators behind the HeatSponge brand of boiler economizers – the most modern steam boiler available globally. Steam boiler economizers from 20 HP to 250,000 pph. Hot Water Boiler Economizers from 500 mbtu to 50 mbtu pph. Conventional and Condensing models available.

Heat-Timer is one of the leading manufacturers of automated heating controls for the HVAC/R and plumbing industry. Known for many innovations, Heat-Timer provides a full range of products in the hydronic outdoor reset, steam outdoor reset controls. Whether your project demands a simple cycling control, or a multi-function control with BAS compatibility, Heat-Timer has a product that does just that-without requiring a high level of control expertise from the operator.

Manufacturer of innovative concepts in steam management. High efficiency vertical flooded heat exchanger skid systems for hydronic heating, clean steam generation and domestic hot water.

Niles Steel Tank is a US manufacturer of ASME code pressure vessels and storage tanks in both carbon and stainless steel. Niles Steel Tank also manufactures glass-lined water storage tanks, large volume multi-coil solar tanks, buffer tanks, specialty process pressure vessel, glass-lined process vessels and glass-lined pipe and fittings.

For over 50 years, Oilon has made environmentally friendly energy and sustainable energy solutions their top priority. The Finnish family-owned company specializes in manufacturing the highest quality, and most efficient burners and combustion systems for liquid and gaseous fuels, industrial heat pumps and chillers, ground source heat pumps for heating homes and solar heat collectors.

Manufactures of hot water, as well as high or low pressure steam fire tube boilers from 5 to 1500 HP. Firetube steel boilers with two, three, and four pass horizontal Scotch Marine designs and vertical firetube designs. Designed and manufactured in accordance with the ASME Code. World class provider of safe, efficient and reliable boilers.

Manufactures a wide range of electric and gas fired steam and hot water boilers, plus accessories and support products for boiler room applications.

Industry leader building high-quality, variable speed technology for plumbing systems. Due to QuantumFlo's efforts, the industry has made a dramatic 180° turn to incorporating variable speed pump systems as the de facto standard for plumbing pressure control.

QuikWater, a OGI Process Equipment company, offers three direct-contact water heaters for industries that range from food and poultry processing and concrete production to commercial laundries, car washing, and manufacturing. Unlike boilers and industrial water heaters, QuikWater systems deliver pure, hot water on demand without the safety risk associated with standard pressurized systems.

Ultra high efficiency copper fin tube boilers for hydronic heating, domestic hot water and pool heating.

Secespol is a leading manufacturer of heat exchangers, with over 30 years of experience. The company is known for innovative and efficient heat exchanger designs, and the ability to adapt them to complex and technologically demanding projects. In addition to standard products like shell & tube, brazed plate and gasketed heat exchangers, Secespol provides tailored heat transfer solutions for HVAC, power generation, food & beverage, pharmaceutical and other process industries.

Manufacturers of venting you can lean on for over 80 years, Selkirk has been the leading manufacturer of chimney, venting and air distribution products. Time-tested commercial and industrial installations throughout North America and globally.

Combustion Controls Division

A leader in the combustion controls industry, and a world-leading supplier of a wide range of innovative products and complete solutions in the combustion control field.

SIMONEAU

Simoneau has been designing and manufacturing industrial and commercial boilers since 1984 for customers worldwide in various industries, including universities, hospitals, food processing, pulp and paper, mining, municipal government building and other types of commercial buildings.

ELECTRIC BOILERS

Sussman specializes in electric steam and hot water boilers for industrial, commercial, and specialized applications. Their experienced technical capabilities meets or exceeds UL, CSA, and NEC standards. All boilers are built to ASME Boiler Codes for Carbon and Stainless Steel Construction.

BOILERSOURCE is a proud member of ASHRAE, ASPE, and an Energy Efficiency and Gas Rebate Trade Ally with Nicor Gas, Peoples Gas, and North Shore Gas.
